EXP-BINSTD-9b18fc — run observation report

Stage 0 RUN-BINSTD-54a677 · 2026-10-11 18:09 UTC

Observations only. Stage 0 stopped in the supervisor pre-execution hook. Stage 1 remained dependency-gated; no catalog, panel, or scientific result was produced.

Bound execution

Field	Recorded value
Goal	`GOAL-ECDLP2M-001`
Experiment	`EXP-BINSTD-9b18fc`
Plan	`trial-plan-v2.json`, SHA-256 `b6f5786e…`
Correction	`CORR-20261011-dace28`
Task / epoch	`TASK-20261011-903edd` / `1`
Stage 0 run	`RUN-BINSTD-54a677`
Stage 1 run	`RUN-BINSTD-6e9fde` — waiting
Host	Darwin; Python 3.12.8

Stage boundary

The Stage 0 producer was `python3 experiments/EXP-BINSTD-9b18fc/implementation/run.py --stage 0 --trial-plan experiments/EXP-BINSTD-9b18fc/trial-plan-v1.json --run-dir experiments/EXP-BINSTD-9b18fc/runs/RUN-BINSTD-54a677`. The sealed receipt records `status = infrastructure_error`, `detail = Exception occurred in preexec_fn.`, and null producer/checker return codes. All logs are empty and the run manifest/raw result are absent.

Stage 1 was not attempted because its frozen dependency was not validated. The Stage 0 catalog, twin probe, admission floors, Stage 1 panels, and `RESULTS.md` were not reached.

Visual record

There were zero comparable measurements, so the visual is a stage-boundary diagram rather than a numerical graph.

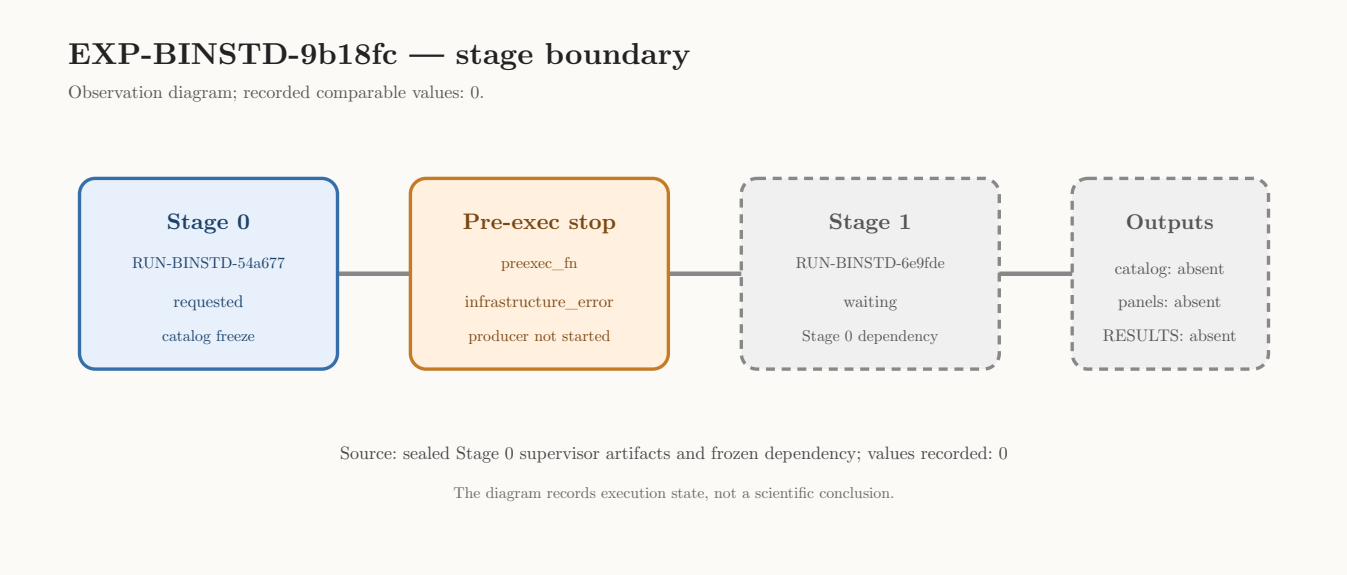

Figure 1: Stage boundary for `EXP-BINSTD-9b18fc`; source data: `graph-data.json` and sealed supervisor artifacts. Recorded comparable values: 0.

Limitations

This report records an operational stop only. It makes no mathematical inference and does not change any research state. The original plan and legacy design queue were not edited.
