Toy Semaev first-fall replay: 80 exact draws

Each tile is one archived seed; numeral is observed first-fall degree.

Five degree-three draws have xR ≠ 0. Quadratic trace cancellation alone does not force a new degree-two fall.

Source: evidence/draws.json; n=4..7, n′=3,4, ten Semaev draws per cell. This is validation data, not a timing or attack-cost plot.
