Fixed public-source witness audit

EXP-ECDLP-cded08 / H-ECDLP-51f052 / GOAL-ECDLP-001

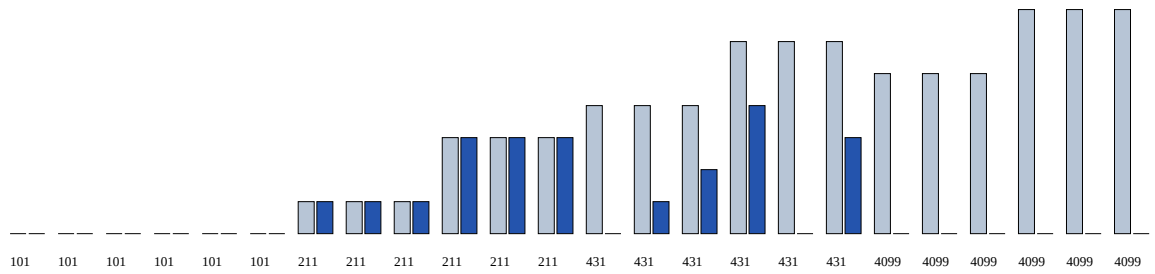
RUN-ECDLP-d25f6a: observations only; no scientific verdict or ECDLP gain claim.

One trial requested and completed; zero failed or timed out. Independent checker passed with zero failed checks. All 11 software controls matched expectations.

Fixed 8 curves x 3 seeds x 64 public scalars x 64 branches = 98,304 attempts. Seeds repeat each curve. The original frozen W was preserved; W2 corrects the manifest schema only.

p	curve UID	U	accepted rows (seeds 0,1,2)	ranks (seeds 0,1,2)
101	0d2d57718f	0	57,63,53	0,0,0
101	e305321d60	0	48,78,58	0,0,0
211	53f0a5d06f	1	13,10,22	1,1,1
211	dc86a1ba8c	3	9,18,9	3,3,3
431	075648ed0f	4	0,1,2	0,1,2
431	4b98c364ab	6	4,0,3	4,0,3
4099	82e5b5f190	5	0,0,0	0,0,0
4099	77b2fb3c48	7	0,0,0	0,0,0

RUN-ECDLP-d25f6a; grey=U, blue=rank; columns; exact finite matrices, n=24 cells



All accepted rows passed independent source/divisor/E2-norm checks; exact projected ranks and full-rank base-log solutions were independently verified. Rejection arithmetic was not independently replayed. F101 U=0 cells are all-public calibration, not new unknown-log recovery.

Measured producer wall 9.407047016 s; CPU 9.402666941 s; peak self RSS 43,618,304 bytes. Checker wall 0.628591363 s; CPU 0.628588297 s; peak self RSS 145,575,936 bytes. Linux x86_64, Python 3.12.14; native memory guard 2 GiB.

Raw operation vectors are not complete weighted S. No current-IC speed comparison, blind recovery or deployed-curve conclusion. The finite stream misses full unknown-column rank on the complete panel; follow-up stages retain their gates.

Clean source revision 3d3e2c96cfafa14709af8b526921ba27ba6b7c0c. Exact command/inputs/resources: ../../runs/RUN-ECDLP-d25f6a/{manifest.yaml,environment.json,raw-result.json,verification.json}. Raw publication 7b34b21ff. Full prose, graph.svg and graph-source.json accompany this PDF.
