Run report: EXP-IC-b75e3a

This report records what ran and what it measured. It is generated by tools/runbook.py from the session journal. It states no verdict, support, weakening or significance; the evidence review does that.

- Runbook: experiments/EXP-IC-b75e3a/runbook.yaml (sha256 23a6576976736c4a8b52ea3dd047837382171a69af83c9057b417e7cbd967aa7)

- Journal tip: de068cfed775bd50dd668f9e687f6702bde608c3092f1aa28191eaf77bc2b12a (5 entries)
- Commit: d7b939e1d917ba7463f1fa5fb3391041015a3429; tracked files dirty: False
- Started 2026-10-16T17:48:33.154975Z, finished 2026-10-16T17:48:40.680759Z; status stopped

Purpose

Retain tool-written unproved bounded observations, all zero yields and instrument limits under the original fixed grid. Native checker agreement is not independent review or an execution proof. No Lean premise has been formalized for this instrument; no Lean or guest receipt is claimed.

Steps

step	status	what it does
S01-trials	failed	Use the unchanged plan and checker under the live root owner claim; preserve all recorded outputs and stop on every failure. The86400second operational timeout matches the existing1440minute authority ceiling.

Units

0 valid of 1; invalid: ['exact-finite-field-seed1729']

trial	run	receipt status	valid
exact-finite-field-seed1729	RUN-IC-51a52f	not_run	False

Metrics

Each value is computed by tools/runbook.py from the recorded outputs named in its source. Labels say whether a value was measured or derived from measured values.

metric	label	unit	n	values
scientific_cells_peak_rss	measured	bytes	0	count=0, max=null, min=null

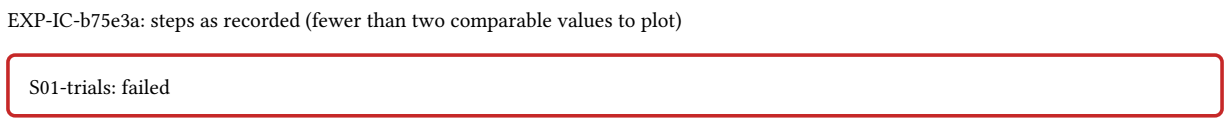

Figure 1: Recorded values from this session only; no new computation.

Validity, proofs and formal obligations

- Execution validity: incomplete
- Control validity: not_applicable
- Inferential validity: not_assessed: review-evidence and the Coordinator decide
- Execution proofs: {"chain": "incomplete: docs/execution-proof-chain.md milestones are open", "failed_units": 0, "unavailable_units": 0, "verified_units": 0}
- Audit: not audited: tools/runbook.py audit (audit-runs skill)

Where it stopped

S01-trials: infrastructure_error: supervisor exit 2 (impediment: the supervisor refused to launch); see experiments/EXP-IC-b75e3a/runbook-sessions/RBS-IC-f59d5a/steps/S01-trials.attempt-1.supervisor.stderr

A stop is an operational fact. It is not evidence about the hypothesis.
